

# XXL REHAB<sup>®</sup>

## PATIENT/DINNER CHAIR

The armrests are constructed so they go beyond the seat. This makes it easy both to get a good grip when a person wants to sit down but also to get up again. We have designed the armrests to bend out like a butterfly, so the body doesn't get squeezed, getting in and out the chair. The butterfly armrests of the XXL-Rehab Patient/Dinner chair also provide much better functionality for the user, compared to other chairs with straight and short armrests where it is almost impossible for a bariatric user to get a good grip.

The height of the chair is adjustable from 44 to 59 cm. It is very important to adjust the chair to the right height to have success getting in and out of the chair. If the chair is too high for the user, the feet will lift off the ground, making it hard to get seated in the chair. If the chair is too low, the user will have trouble getting up.

It is often a problem for bariatric users to be seated comfortably. Sometimes the seat depth is too short, sometimes too deep and with no back support. We have designed the seat to be individually adjusted to provide a comfortable seating. The backrest can be moved +/- 6 cm and the bended tubing assures that the right comfort can be found.

It is made easy to both handle and move the chair from place to place. In the construction of the chair we have only used high-tech lightweight tubing, to provide the highest strength at the lowest weight.

**STRONGLY ENGINEERED AND FUNCTIONALLY DESIGNED  
EXCLUSIVELY FOR BARIATRIC USERS!**

**SPECIFICATIONS**

Model 1    Model 2

Maximum weight capacity is	325 kg	
Seat width	61 cm	71 cm
Total length	80-101 cm	
Seat depth	40-52 cm	
Seat height	44-59 cm	
Backrest height	37 cm	
Distance from floor to seat underside	33-48 cm	
Total width	69 cm	79 cm
Total height	79-94 cm	
Total weight	16.6 kg	17.6 kg
Total outer width on armrests	74 cm	84 cm
Seat / back / armrests	Polyurethan	
Frame	Powder-lacquered chromium molybdenum steel	
ISO - classification	ISO 09 33 03
